2 GOAL

This document describes how some of the most commonly used Business Intelligence tools can be connected to Denodo.

3 CONTENT

In the table below, a list of BI tools is presented and the possible ways to connect them to the Denodo Virtual DataPort Server.

In general, any BI tool which provides a JDBC or ODBC interface can connect to the Virtual DataPort Server. We recommend to refer to the articles mentioned in the references as well as to the documentations provided by the vendor of the BI tools for further details.

BI Tool	Access Interface	Additional information
Alteryx	ODBC	How to connect to Denodo from Alteryx
IBM Cognos	Since version 11.0.3: Native Connector to Denodo	Connecting to Denodo from Cognos
Informatica Power Center	ODBC JDBC	How To Access to VDP from Informatica PowerCenter through ODBC How to access to VDP from Informatica PowerCenter Express on Linux
Looker	Since Looker 3.50: JDBC	Connecting Looker to Denodo
Microsoft SQL Server Reporting Services (SSRS)	ODBC	How to access Denodo Virtual DataPort from Microsoft SQL Server Reporting Services
Microstrategy	Since version 10: JDBC Older versions: ODBC	Microstrategy Data Source Connectors
OBIEE	JDBC ODBC	How to access to Denodo from OBIEE
Pentaho	JDBC ODBC	How to connect to Denodo from Pentaho
Power BI Desktop	Since 2.63.3272.40461 64-bit (October 2018) a Denodo Connector is available out of the box	

Qlik	ODBC	Qlik Denodo Integration: How to guide Qlik connectors documentation
SAP Business Objects	JDBC ODBC	How to access VDP from SAP BusinessObjects
SAP Lumira	JDBC	How to use VDP as a SAP Lumira Data Source
Splunk	JDBC	Splunk integration with Denodo
Tableau	Since Tableau 10.4: Native Connector to Denodo Previous Versions (before 10.4): ODBC adapter	How to connect to Denodo from Tableau Desktop
Tibco Spotfire	JDBC	Connecting to Denodo from Tibco Spotfire
