## Content

From the Denodo Solution Manager the information about the local license installed can be found in the Startup/Help screen clicking on the link “License information”.

From the Denodo Control Center the information about the local license installed can be found in the Startup/Help screen clicking on the link “License information”.

To install a new license the “Install license” link can be used to browse to the new license to install.

If, for any reason, it is not possible to use the Denodo Control Center to see this information these steps can be followed to see the license details:

1. The license currently installed is located under <DENODO\_HOME>/conf/ in the file with name “denodo.lic”.
2. The second line of the file contains the license code used in the installation.

To install a new license without the Denodo Control Center:

1. Download the license from your support site account.
2. Stop all Denodo services.
3. Replace <DENODO\_HOME>/conf/denodo.lic with the new license file.
4. Rename the license file to denodo.lic.
5. Start the Denodo Services.

Also using the Solution Manager Administration Tool

1. Launch the Solution Manager Administration Tool
2. Select License -> Global License Information

The screenshot shows the 'Global License Information' page in Denodo Solution Manager. The page is divided into a left sidebar with a navigation tree and a main content area displaying a table of license details. The navigation tree includes 'Solution Manager', 'Training', 'Virtual DataPort 5.0', 'main\_server', and 'scheduler'. The main content area shows a tree view of license information for 'Solution Manager', 'VDP', and 'EVALUATION'. The 'VDP' section is expanded, showing details for 'Feature', 'Max Sources', 'Source Types', 'Denodo Browser Allowed', 'Extensions Allowed', 'JMS Listeners Allowed', 'Product Name', 'Resource Manager Allowed', 'VCS Allowed', 'View Parameters Allowed', 'Expiration', 'Generation Date', 'Licensee', 'Product Name', and 'Provider'. The 'EVALUATION' section is also expanded, showing details for 'VDP', 'Scheduler', and 'ITPilot'. The 'Licensee' field in both sections is redacted with a black bar.

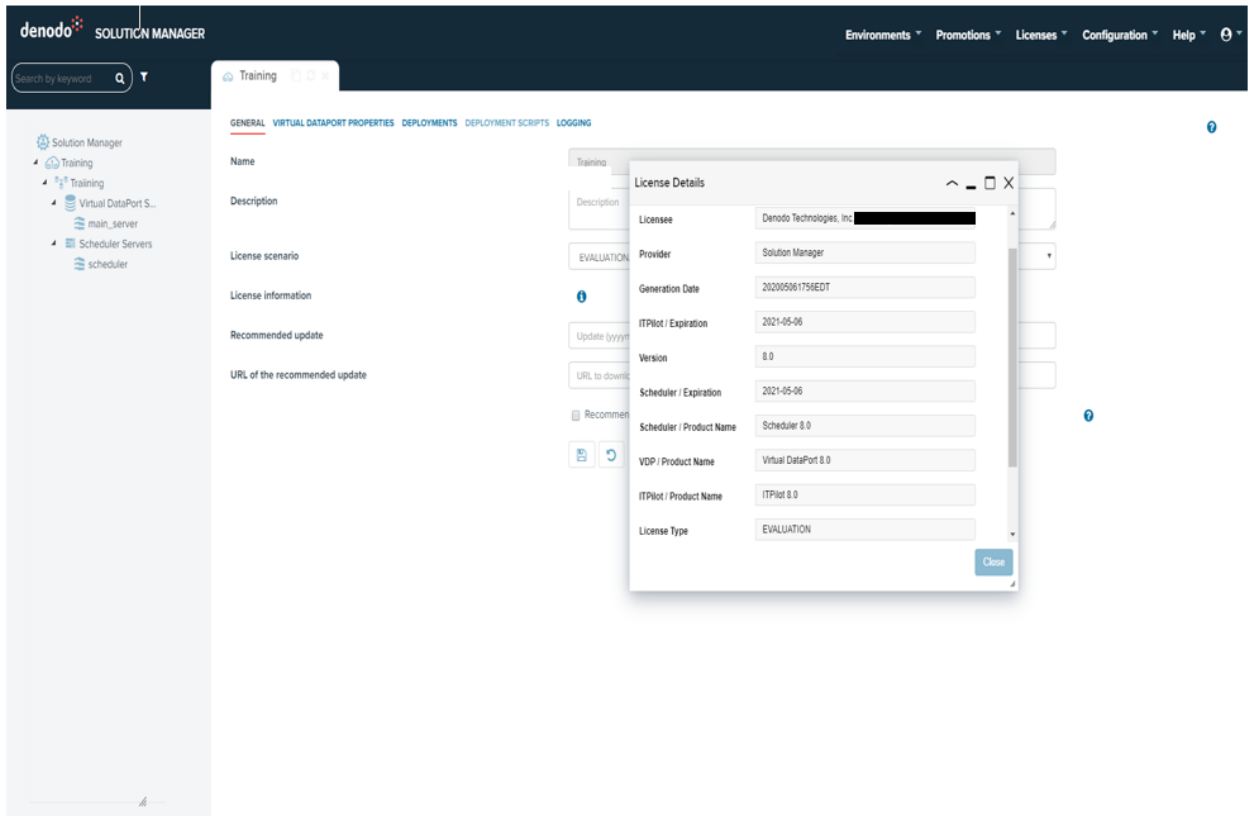

| Category         | Item                     | Value   |
|------------------|--------------------------|---|
| Solution Manager | Max Sources              | 0   |
|                  | Source Types             | ARN, CUSTOM, DF, GS, ITP, JDBC, JSON, ODBC, WS, XML, EXCEL, SAPERP, SAPBW, OLAP, ESSBASE, SAPBWBAPI, SALESFORCE |
|                  | Denodo Browser Allowed   | 0   |
|                  | Extensions Allowed       | 0   |
|                  | JMS Listeners Allowed    | 0   |
|                  | Product Name             | Virtual DataPort 8.0  |
|                  | Resource Manager Allowed | 0   |
|                  | VCS Allowed              | 0   |
|                  | View Parameters Allowed  | 0   |
|                  | Expiration               | 2021/05/06 ✓  |
|                  | Generation Date          | 2020/05/06 17:56  |
|                  | Licensee                 | Denodo Technologies, Inc. [REDACTED]  |
|                  | Product Name             | Solution Manager 8.0  |
|                  | Provider                 | Solution Manager  |
| EVALUATION       | Expiration               | 2021/05/06 ✓  |
|                  | Product Name             | Virtual DataPort 8.0  |
|                  | Expiration               | 2021/05/06 ✓  |
|                  | Product Name             | Scheduler 8.0   |
|                  | Expiration               | 2021/05/06 ✓  |
|                  | Product Name             | ITPilot 8.0   |
|                  | Generation Date          | 2020/05/06 17:56  |
|                  | License Type             | EVALUATION  |
|                  | Licensee                 | Denodo Technologies, Inc. [REDACTED]  |
|                  | Provider                 | Solution Manager  |
| Version          | 8.0                      |   |

Also you can select the specific environment in the Solution Manager Administration Tool
